DETAILED ACTION

Allowable Subject Matter

1. Claims 1-8, 10, 12-18 and 20-26 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1-8, 10, 12-18 and 20-26 are allowable because the prior art of record neither anticipated nor rendered obvious that a device for displaying image and a method for reducing glare in a display device comprises various related elements and steps with specific features recited in claims 1, 10, 20, 21 and 26 as follows:

a first (internal) circular X-polarizer having a first side (lower side) adjacent to a first side (upper side) of a black light; a liquid crystal display set to quarter-wave retardation having a first side (lower side) adjacent to a second side (upper side) of the first (internal) circular X-polarizer; a mirror having a first side (upper side) adjacent to the first side (lower side) of the liquid crystal display; and a second (external) circular X-polarizer having a first side (lower side) adjacent to a second side (upper side) of the liquid crystal display as shown in Fig. 2.

The reference Kalmanash teaches a variable optical retarder and using voltage switching imposed by liquid crystal cells, but does not teach a liquid crystal display set to quarter-wave retardation as claimed. The reference Koyama teaches a part of a liquid crystal layer serves as a quarter wave retarder, but does not teach a whole liquid crystal display set to quarter-wave retardation as claimed. The other references such as Ulrich et al and Sharp et al show a liquid crystal layer acts as a quarter wave retarder

but do not teach using a liquid crystal display set to quarter wave retardation as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
